In the Specification:

Please amend paragraphs 0033 and 0034 as indicated below.

[0033] In a one aspect, the principles of the present invention may be implemented by computer readable code executed by processor 703. The code may be stored in the memory 704 or read/downloaded from a memory medium 783, an I/O device 785 or magnetic, optical media <u>787</u> such as a floppy disk, a CD-ROM or a DVD.

[0034] Requests from the device 701 received by I/O device 702 after processing in accordance with one or more software programs operable to perform the functions illustrated herein may also be transmitted over network 770 to one or more output devices represented as display 780, reporting device 790 or second processing system 795. As discussed with regard to FIGS. 4-6, an indication responsive to the requested service is returned to the requesting device. The returned indication typically is provided through network ~~630~~ <u>750</u> but may be provided by other communication media (not shown).
